**DISCLAIMERS**

This tudaBirds tweetpaper is provided for informational purposes only and will be subject to our website's data, dates, terms and conditions, and privacy policy.

The tudaBirds theme is competitions, battles, games, building, and fun: a secure, fair place to compete, observe, collect, win, earn and invest.

-----  
tudaBirds.io will have all the rules, terms, instructions that you will ever need.

# COMPANY OVERVIEW

Founded by a team of highly experienced blockchain business people and techies – and talented artists, tudaBirds are at the tip of our nest and ready to fly.

We believe in DeFi and the delivery of crypto-centric services directly. We believe that the environmentally friendly Solana and low gas BSC blockchains will enable us to deliver as flexibly and as directly as our users and investors choose:

- **\$BURD will trade and maintain liquidity pools on PancakeSwap and Raydium decentralized as well as the CoinsBit.io centralized exchange**
- **tudaBirds NFTs will be minted and traded at compatible BSC and Solana NFT marketplaces**
- **Direct wallet-to-wallet transaction as well as cross-chain bridging for users and investors using tudaBridge**

## **Our Unified View:**

One consistency across the team is the clear agreement that tudaBirds is a game-changer. With our unique twists, the values added, and utility use of our tokens and our unique, evolving non-fungible Bird NFB NFTs – and the broad sets of games, user earning opportunities, passive revenues and real-world/digital bridge gaming – we all are here to take tudaBirds tudaMoon.

## **The Team:**

We are a self-funded, team-owned business: together for years, we have, collectively, a strong track record of architecting and developing finance and fintech solutions and applications as well as DeFi coin staking, swaps, wallets, and other financial dApps.

We are most successful in combining visions and solutions with views across genders and generations, across experience, and across cultures: we always seem to come up with the correct answer together.

The team's co-founders, senior Management and well-respected Advisors are fully doxxed and can be seen on our website.

Also, our transparent \$BURD token contracts on our GitHub repository (Solana, created with SPL and BSC, professionally audited with a 10/10 score), combined with our CoinsBit.io centralized exchange listing, a wealth of solid business partnerships, our commitment to publish the math behind all games, a win-win-win business model, provide objective credibility indicators.

# INTRODUCING TUDABIRDS

"tudaBirds... tudaMoon... avatar NFTs and PFPs... a bright future promised for all" : Some days, that one line would seem to be enough to flog \$20 million in NFTs to collectors and speculators in 20 minutes.

Yes, tudaBirds are all the above - but far from another copycat set of avatar NFTs. tudaBirds is an all-new, innovative hybrid DeFi ecosystem of competitive social gaming.

The tudaBirds metaNest is an economically and environmentally sustainable strategic delivery vehicle designed to attract players, collectors, investors, speculators, and users of all interests, with our delivery targets including:

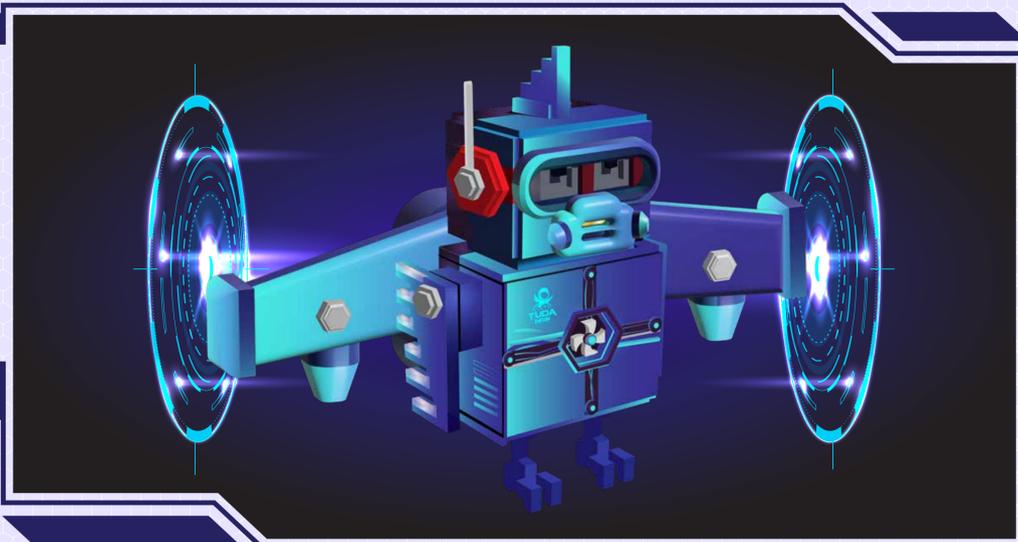

1. A unique, value-add NFT-integrated token economy
2. Active and passive revenue shares directly benefiting users, players, collectors, investors, and holders of both \$BURD and our NFTS
3. Evolving avatar NFTs: tradeable and user-reminting of multiple-asset NFTs
4. Shallow fee structures and gas using the BSC and Solana blockchains

The component architecture that is the metaNest backbone delivers standard systems and interconnects so that we will be able to rapidly deploy and provide a set of unique DeFi and NFT games, innovations, and experiences both directly and with 3rd party game devs. The planned "nestBet" system enables gaming – by anyone on anything – across the metaNest: games, sales, likes, leaders, losers: anything, using our inter-connected leaderboards, virtual game rooms, and advanced profile/avatar management.

## Hatched and ready to fly

from day one launch, the doors of the tudaBirds metaNest open with our first game, Battle200X. Played with \$BURD, \$BNB and \$SOL, Battle200X is a snapshot preview of the types of experiences our team is putting together.

## »»» TUDABIRDS EYE VIEW: EVOLUTIONS «««

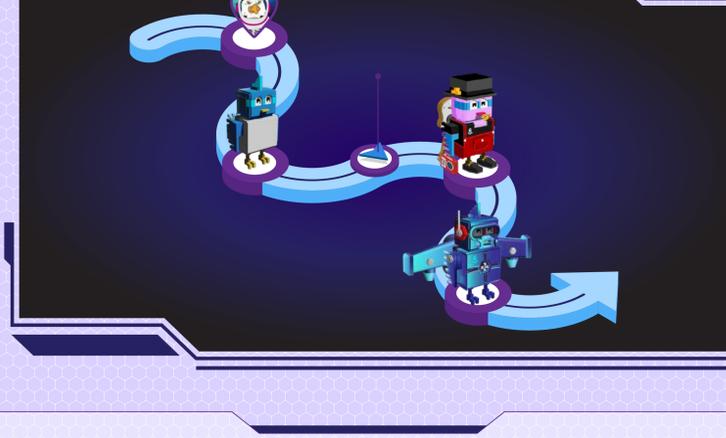

We're birds! What else could we be?  
And, by the way, we don't do public breeding like common kitties and electric horses (and who knows what the punks & apes are up to?!)

tudaBirds NFB (non-fungible Birds) NFTs will combine with "evolution" NFTs to extend access, increase levels and reflect metaNest experiences gained.

Fine-looking tudaBirds taking our DeFi user base tudaMoon.

# OUR ROADMAP, SO FAR

An overview look at our roadmap through to the start of next year: essentially, finishing the fundamentals as discussed above - and building tudaMoon from there. We have a clear set of targets beyond the roadmap:

enhancing the use of virtual real estate in the metaNest with user-configurable game delivery to increase user earning opportunities and extend benefits to evolving avatars.

With community and partner service, we are bringing the tudaBirds metaNest so many things to play, ways to play, bet, interact and earn, participate and win, for users with all types of interests... and even creating new user types along the way.

The planned nestBet systems allow gaming, playing, winning, and earning at every point of contact that can be imagined.

Gamified NFT Evolving Avatar Drop

Bird Tris released & 50+ strong games library

Gamer Streamer Integration  
User Earning Model(s)

Virtual Room NFT Sale

## WHAT NEXT?

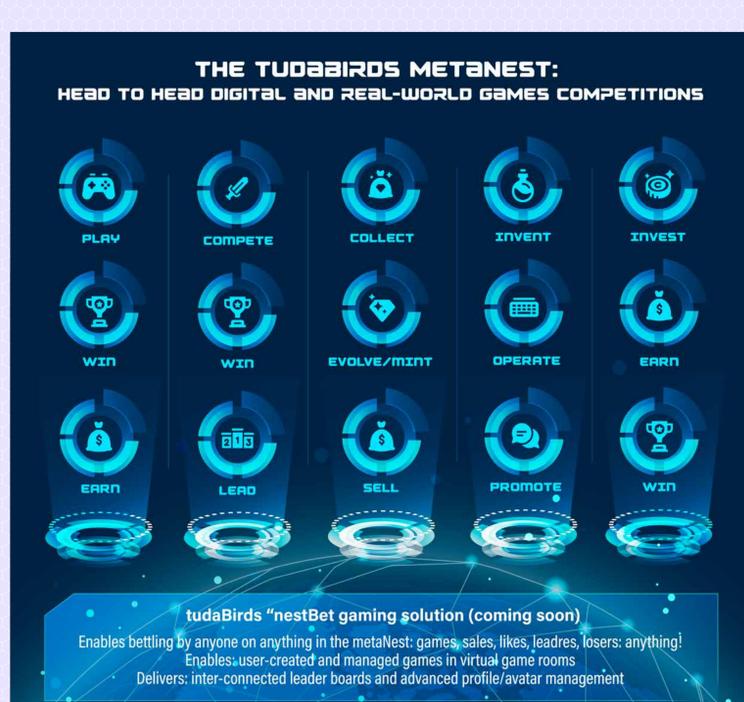

As soon as we can manage it, we will be implementing socialized games to connect real people, in real-time, in old-fashioned games and competitions - and flash-bang slick and modern presentations.

With extending our NFB avatar evolutions and planning new NFT releases, our team of artists and designers are working to create tudaBird-themed games and challenges - and our team is also designing tudaBirds animated entertainment programs.

To complete our complement of cross-chain support, the metaNest will add two additional blockchains, supported by our in-nest tudaBridge. Planned before the end of Q2 2022, the final choice of which chains we will add will be made in consultation with our community.

After that, we're assuming it will be a Netflix or AdultSwim animated series. Still, we'll see about that because why wouldn't we try? Worst case scenario, we'll have Apple+, Hulu, and Amazon Prime Studios as solid back-ups.

## WHY TUDABIRDS

Blockchain and NFT technology continue to dominate headlines. The gaming and gambling space has a strong and growing share, with 80% of all ethereum traffic attributed to decentralized betting and gaming transactions over the last two years running (binance.com, June 2021).

Gaming growth has also overtaken a large piece of the NFT pie, with 44 percent of gamers purchasing or trading game items on the blockchain.

tudaBirds delivers to these steady and increasing trends - on the secure BSC blockchain. And tudaBirds NFTs offer real utility for users and players in the tudaBirds metaNest.

## WHY \$BURD

Our major differentiators as a business are that we are, from day one, revenue-generating: all we need are players and collectors. Given that pretty much any level of market research assures you that they are out there, we have a token model and economy sure to catch their eyes.

\$BURD isn't a matter of hoping we can find people to believe in our token: its value is a given. All we need are interested players: the rest and the revenues and the promise of what is yet to come is the surest direction we can make regarding the value of the \$BURD token as an investment.

tudaBirds avatars evolve and are moving on from breeding to evolving: tudaBirds have no limits... they can go where the imaginations of our artists, our game makers, partners and our users.

## TUDABIRDS: OUR GUIDING PRINCIPALS

- Practical, sustainable, and transparent application of blockchain technology
- Fair funding supported by both NFT sales and in our public token pre-sale and sale which will generate the primary currency and the bankroll required to support the games offered within the tudaBirds metaNest and the development of our roadmap
- Innovative application of digital scarcity and ownership, providing user application and functionality within a decentralized ecosystem, with a broad set of models and games encouraging value-adds to user's ownership and usage of tudaBirds NFT digital collectibles - and their open trade
- Belief in our team, our players, our community, our investors - and in the blockchain: we will build, listen, innovate and serve all of the above: without them, we cannot succeed.

# THE TUDABIRDS METAEST, PHASE 1

The tudaBirds metaNest is the home of spectacular high-win, high-entertainment gaming and other player experiences, powered by \$BURD, \$BNB and \$SOL. In brief, the metaNest will be the go-to DeFi gaming location for

- **Gamified games: loyalty, experience, drops of all kinds**
- **Interconnected leaderboards: bet on, with, or against the players**
- **Head-to-head invitationals: win extra when you beat the leaders**
- **User-promoted clubs, games, and tournaments**

So, that is a little about the gaming. Next up, the gamified NFTs. From random rarities and documented attributes through to attached token airdrops, tudaBirds NFTs are for collectors, builders, sellers, players, and speculators.

- **Evolving tudaBird avatars: higher levels, increased rewards, exclusive offers**
- **2d and 3d NFTs: drops, sales, galleries, marketplace, raffles, and lotteries**
- **Virtual Real Estate NFTs: buy a piece of the metaNest: future revenue speculation**
  - **Utility use of NFTs**
- **Rarity and scarcity tags across collections ensure**

Finally, we have transparent revenue-based reward mechanisms benefiting all \$BURD holders and our accessible, fair and open games.

As much as we'd like to, we can't deliver everything tomorrow. But we have a pretty good starting spot: with the proper funding from that start, though, we plan to deliver magic!

So the tudaBirds metaNest Grand Opening starts with the release of Battle200X and our TokenPuzzle game, and the head-to-head birdTris is coming very soon.

## ➤➤➤ BATTLE200X: PREDICT, WIN, EARN AND LEARN ◀◀◀

With per games winnings up to 20,000% against the up & downs of the crypto market, Battle200X provides comprehensive, fair play gaming experiences

- **Head-to-head (to head) crypto price prediction battle rooms**
- **Multi-bag opportunities every game: profit from your insights and your instincts**
  - **Players can go up against the leaders at winners' invitational tournaments**
- **High-volatility play with user-selected small Cap coin of the week (coming soon)**
- **Player awards: including token bonuses, NFT drops, tickets, and other prizes**

Lightning, hourly, and overnight betting rounds all tracked on our player leaderboard: player intelligence and experience, current crypto news feeds - and player discussions on discord and telegram: a winning formula to score on the volatility of the crypto world

**Small-Cap Coin of the Week: a Battle200X original(coming soon)! Cross-community polling will deliver mutual exposure to large-community memes and other small-cap cryptos.**

Planned enhancements to the Battle200X rooms include in-game player chats; a special edition Battle200X NFT collection; special metaNest drops of random NFT and vouchers; live-streaming lightning tournaments - and leaderboard wagering where players can bet with, against, or along with the game's leaders.

### TUDABIRDS EYE VIEW:

**THE 10,000,000 TOKEN \$BURD AIRDROPS**  
Team tudaBird has decided that Battle200X, the premiere game in our shiny new metaNest, needs to deliver something special

**So, why not 10 Million tokens?  
50 \$BURD per game  
Every single game??  
Just for playing??  
Very Nice!**

**10,000,000 \$BURD Battle200X airdrop  
50 tokens per player per game, win or lose!**

## ➤➤➤ OUR NFT BIRD DROPPINGS ◀◀◀

A unique offer, a unique approach: a gamified NFT drop... a total of 9,000 unique NFB NFTs - non-fungible birds - comprising different collections and editions: first come, first served but with the luck of the draw.

With specific rarities and scarcities randomly scattered through the sets of the 9,000 tudaBirds NFTs, 10% of buyers will also have their nests feathered with a randomized bonus of 9,000 \$BURD tokens.

The NFT9K funds will support metaNest and game development and marketing, marketing, and marketing. But we aren't giving away any more of the secrets, yet, beyond the fact that the Pioneers Collection - available on both chains - will always be available for entry-level players in the metaNest. Our following collection, Evolution#1, will continue the theme of our evolving NFT avatars.

And, whichever way you play it, it, tudaBirds evolving NFTs will deliver more than a couple of industry-firsts.

## ➤➤➤ CBO SIGNATURE NFT COLLECTION ◀◀◀

This special NFT collection features an exclusive set of 3D tudaBird long-form video NFTs, handcrafted by our Chief Bird Officer.

Sneak peeks of the Signature NFT collection are available on OpenSea.

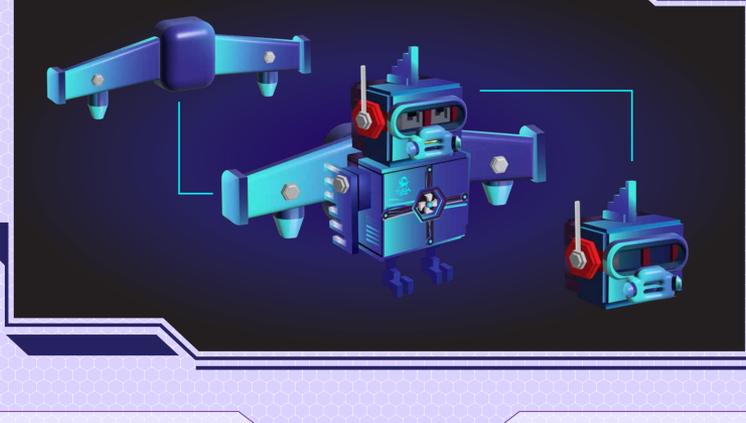

### tudaBirds metaNest Virtual Gaming Rooms Sale

This first sale will offer 500 rooms and suites from a total real estate NFT cap of only 2500. The scarcity of rooms protects and encourages the value of the speculative investment made.

These virtual real estate NFTs will be freely movable tokens, designating the ownership of a particular property class (3/4/5-star rooms and suites, either in-metaNest, outdoor, waterfront, or with a view of the launchpad).

These virtual rooms will form a considerable part of the community DeFi gaming and NFT experiences to be delivered after the phase 2 opening.

# \$BURD AND NFT MECHANICS

## OUR UTILITY TOKEN

tudaBirds \$BURD tokens are minted on the BSC and Solana blockchains. Use of the token may earn various privileges and bonuses such as increased winnings, increased revenue share participation, and other benefits.

## PRIVATE AND PUBLIC PRE-SALE AND SALE

\$BURD will be offered in private and public pre-sale and sales. For large-scale \$BURD investors, with bonuses including purchase discount, limited edition NFT awards, and other value-adds.

We also have matching offers for mid-range investors, again to a capped amount: bonuses will be awarded on a first-come-first-serve basis.

Subsequently, a discounted public \$BURD pre-sale for up to 10% of the token cap will be held, followed by an additional 10% at market rates.

tudaBirds metaNest revenues are generated from our users – and so they are shared with our users. And no gimmicks with payouts either.

For more details or to arrange a chat, please see our website or reach us at [investors@tudaBirds.io](mailto:investors@tudaBirds.io)

## OUR TOKENOMICS

The tudaBirds advantage is that, as an operating, revenue-generating business that will apply all revenues to keep the fires stoked, the \$BURD token is well-positioned for support and growth from day one.

Here are the \$BURD basics:

- Total \$BURD supply: 1,000,000,000  
Initially 25% on BSC and 25% on Solana
- Initial Listing Price: \$0.01
- Private pre-sale: 10%; Public pre-sale: 10%; Public sale: 10%

**NO Burns:** The tudaBirds model of revenue distribution and liquidity support means that we do not need deflationary or inflationary tricks: \$BURD value will be supported directly as a result of token and NFT sales, gameplay, and other activities in the tudaBirds metaNest – and by our commitment on both marketing and dev spend.

\$BURD tokens have no transaction taxes. Our BSC token does have a Liquidity Fee of 1% in the token contract: when 500,000 \$BURD are accumulated the token contract automatically purchases BNB with 50% and adds the BNB / BURD to our liquidity pool.

## USAGE OF FUNDS

- **Community:** aggressive marketing, community expansion
- **Company Operations**
- **metaNest Development & Games Development rapid growth plans**
- **Art team expansion**
- **Target 70% + of the invested amount will be applied as liquidity**
- **Staking and Rewards:** revenue generation and pool stability
- **Additional Reserves:** futures... (secrets yet to be revealed)
- **Games Bonus Reserve(s):** designated in-game token rewards
- **Team and advisor sustenance and acquisition**

With revenues applied to maintain liquidity, increase earnings, sponsor tournaments, and special fund events and earning opportunities, the \$BURD token economy is healthy and self-sufficient, with a set token cap that will never be exceeded.

Winners and losers are active participants and beneficiaries of tudaBirds revenues, with users and holders of the tudaBirds tokens gaining extra as a reward for their participation.

## TOKEN LOCK-INS

Team and advisor tokens are 100% locked for two months, followed by a monthly releases schedule over ten months.

Substantial investors (2.5% token cap minimum) agreements, in exchange for a two-year revenue share agreement, will be 75% locked (with 25% released, post-public sale) for twelve months.

Token sales will be applied to \$BURD liquidity pools on QuickSwap until the liquidity targets are fulfilled.

## TOKENS OVERVIEW

### \$BURD UTILITY TOKEN

- tudaBirds \$burd tokens are minted on BSC and Solana
- When using tudaBirds metaNest, various privileges may be granted
- Players using \$BURD will be rewarded bonuses such as increased winnings and increased revenue share participation
- \$BURD holders can participate in upcoming monthly revenue share lotteries

### PASSIVE REVENUES FOR \$BURD HOLDERS

- 66% of ALL retained metaNest revenues shared proportionally to \$BURD holders

### PASSIVE REVENUES FOR NFB HOLDERS

- 33% of ALL NFT9K NFB after-market royalty revenues shared to \$BURD holders

### TUDABIRD NFTS

- Are classified and tagged into rarity and scarcity tiers, i.e. common, uncommon, rare, legendary, and mythical, DeFining characteristics of each
- Can be traded, swapped, and sold within the tudaBirds metaNest marketplace (only before being part of an avatar evolution)
- 33% of ALL NFT9K NFB after-market royalty revenues shared to NFB holders

### TUDABIRD METANEST REAL ESTATE NFTS

Our real estate NFTs entitle holders to 'ownership' of a numbered, designated room in the tudaBirds metaNest. With a maximum cap of 2,500 room swapping, placeholders currently include user-sponsored, promoted, and created games, with revenue shares and rewards.

### TUDABIRD AVATAR NFBs

Non-Fungible Birds: multi-function tokens:

- Evolutions are sold, won, or awarded and are attached contractually to the user avatar NFT
- The joined contracts represent 'evolved' tudaBirds and can be used as a player identification and avatar in the metaNest

The avatar NFB smart contracts have uncounted billions of variations of phenotypes (what you see) and genotypes (what you don't see): multiple and overlapping evolutions will increase the rarity and value of the NFB.

## THE TUDABIRDS METANEST, PHASE 2

### STREAMING PLAY & VIDEO CHALLENGES

(COMING SOON)

Twitch.tv streaming and gaming rooms: game players can bring their streams to a virtual Game Room in the tudaBirds metaNest and enable their viewers and fans to bet on (or against) them. Phase 1 enables the players to create the bets while the next phase will enable the viewers to create (and earn from) betting scenarios.

And don't forget the video challengers of the 'net. The streaming mechanism will also apply to TikTok and other live video challenges, enabling players to wager on 'will he / won't she' scenarios to leverage the massive growth of this entertainment sector.

### EVOLVING AVATARS – NFBs

(COMING SOON)

NFBs. Non-fungible Birds. Our NFT avatars tokens (and we promise we won't call them avianatars. But we could have, so we thought it was vital that we point that we aren't).

This is where things get interesting.

#### Evolving tudaBirds

Rather than breeding like common kitties and horses – and who knows what the punks and apes are up to – tudaBird NFBs evolve to increase their levels, strengths – and their value.

Evolution types: NFTs range from helmets, boots, jetpacks, and spacesuits of all kinds at all levels of rarity and scarcity. They also include badges marking actual player achievements and experiences while also adding to their value as collectibles. And there will be more.

Won, earned, purchased, or swapped in and around the tudaBird metaNest, users can choose to permanently mint an evolution NFT with a tudaBird NFB avatar increase levels, access, and rewards...to get tudaMoon, to Mars and beyond, taking the \$BURD (and lots of birdseed) as payload.

Evolved avatars may add directly increased game wins and other revenue benefits.

The tudaBirds community of Bird Crafters builds rare, unique avatars for sale on the open market to players looking to skip ahead – and for collectors of all beautiful birds.

We will start with a limited set of 9,000 First Edition Avatar NFBs, on both BSC and Solana

Our artists and product team are also working away on a set of exciting enhancements to NFB use, including virtual, upgradeable nest NFTs and other value-add personalization elements.

NFBs may also be rewarded during metaNest gameplay or as lottery or raffle prizes. We will also provide users with access to rooms in the metaNest to create and mint their own tudaBirds evolution NFTs.

### BIRDTRIS: BEAK-TO-BEAK BATTLES

(COMING SOON)

birdTris: retro is back, better than before with games to win, leaderboards tracking players to support (or bet against!), and opportunities to earn in the tudaBirds metaNest.

birdTris will be the first tudaBird NFT and avatar NFB-integrated game: not only can users choose which NFT or avatar to use on their profile, but gameplay will include random drops of raffle tickets for draws – and the occasional random drop of – avatar evolution NFTs to players – to move players along the way to evolving their tudaBirds.

Two-player, head-to-head games with great winnings, \$BURD rewards, experience gathering, and, of course, \$BURD holders win either way, with the metaNest token-supporting revenue share model including revenues from Live birdTris championship games and user tournament streaming on twitch and YouTube.

Daily, weekly, and monthly mixed championship and player tournaments will be held, along with monthly Champions only games. Users can join the game, bet for or against the players and tournament results.

In an upcoming release, users will also host, manage and promote their tournaments and streams and create private birdTris club rooms for internal competitions, private club-to-club challenges, and club-only tournaments.

### FUTURE GAMES AND COMPETITIONS

(COMING SOON)

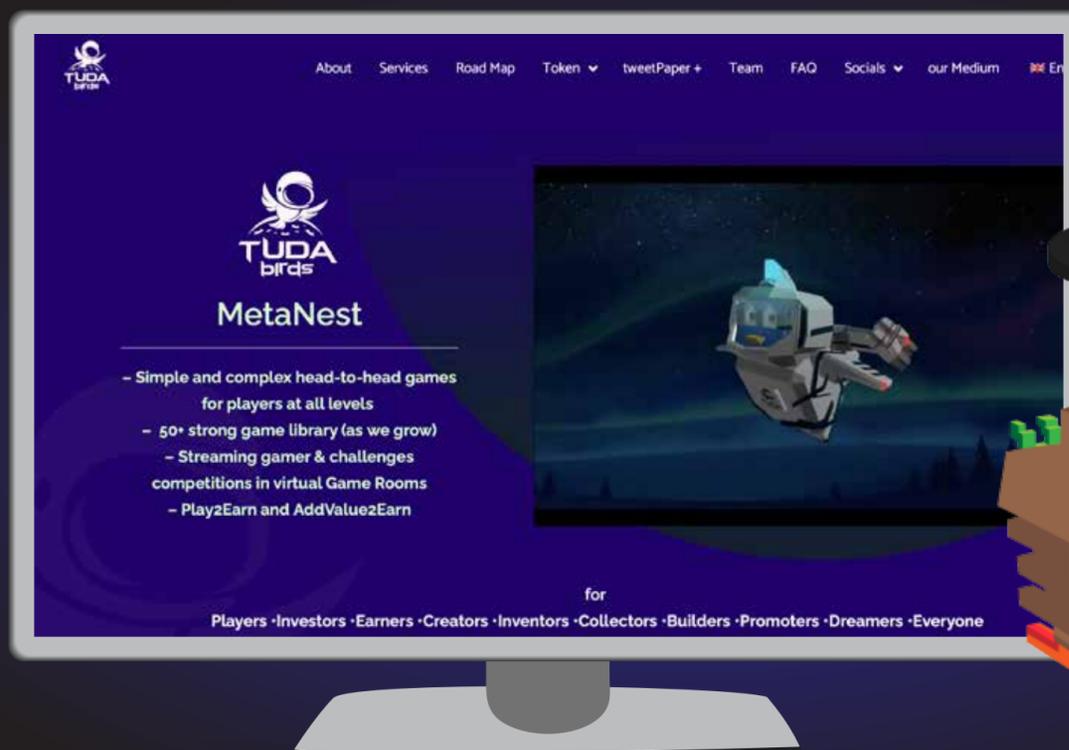

The tudaBirds metaNest is the new home of socialized competitions: digital-games, new and old – physical games by video and first-person, connecting real people. The metaNest hybrid approach of virtual real estate, shared revenues, earning opportunities, great winnings, and fun, socialized competitions of ALL forms and formats: from pong to trivia and from Battle200X to animated avatar racing games: real-time, new and old, games and competitions with slick modern presentations and streaming connectivity.

Working with our team and partners, the tudaBirds metaNest will host hundreds of private and public game rooms.

And, like everything tudaBirds, your avatar will be along for the entire journey.
